EXPERIENCE

Betsson Group   Budapest
FRONTEND DEVELOPER   MAY 2024 - Present

- Currently contributing to the development of multiple Betsson brand frontend websites across the world using Angular and StencilJS.

Digital Thinkers (Agency)   Budapest
Senior Full Stack Developer   MAY 2023 - APRIL 2024

- Learned PHP and used the Laravel framework to build an API for a Danish business management tool that assists in creating sustainable strategic plans and prioritized action plans

- Took over the project, which entailed engaging in client and partner discussions, handling frontend development, and successfully executing data migration for a seamless system transition

- Contributed to the development of an API for a Danish education platform, facilitating seamless user registration and course payments. Implemented synchronization between CMS and API, integrated CRM functionalities, and successfully launched the API live

Full-time Freelancer   Remote
Full Stack Developer   DECEMBER 2022 - APRIL 2023

- Developed a single-page drag-and-drop story writer application by designing its architecture and utilizing React, NestJS, React Query, JWT, and REST API.

- Played a role in maintaining a large custom CMS that was constructed with Gatsby and GraphQL

ViddL   Budapest
Full Stack Developer   JUNE 2021 - DECEMBER 2022

- Utilized Nest.js and MongoDB to develop a notification service for notifying parcel recipients through Messenger, Email, and SMS.

- Developed a parcel tracking site using Next.js SSR

- Optimized the client-side PDF rendering process in React by using Web Workers

- Developed a courier mobile application using React Native

- Created a React-based admin dashboard for managing parcels, couriers, and processing CSV files

Cogito Technologies   Budapest
Full Stack Developer   JUNE 2021 - AUGUST 2022

- Developed static landing pages for multiple companies with the use of Gatsby, Next.js and serverless functions

- Collaborated on both the frontend and backend development of an e-learning platform, using React, React Native, NestJS, and MongoDB.

Chamaileon   Budapest
Full Stack Developer   SEPTEMBER 2018 - JUNE 2021

- Worked within a scrum team in agile software development environment

- Developed REST API in a micro service architecture using Express and MongoDB

- Worked on a Single-Page Application and a drag & drop editor using Vue.js, Vuex

- Implemented real-time editing using Pusher

- Developed an SDK to enable product white-labeling

- Collaborated on integrating Mailchimp with our system

- Built micro frontend plugins for our system.
